Postdoctoral Scholar Position in Analysis and Control of Complex Networks

Applications are invited for a post-doctoral position in the Department of Mechanical Engineering in the Bourns College of Engineering at the University of California, Riverside. The position will be in the broad area of analysis and control of complex networks, with application to the engineering, biological and social domains. The appointee will join Prof. [Fabio Pasqualetti](#)'s group, lead interdisciplinary research activities, and interact with faculty and scientists across the college.

The position is open to recent PhDs in applied mathematics, computer science, statistics, engineering, physics, and related fields, with demonstrated ability to conduct high impact research. The ideal candidate will have exceptional computational, analytical, and communication skills, and will have outstanding potential for scientific research. Competitive candidates will also have familiarity with control theory and system identification, data analysis, and network modeling.

To apply, please email a CV, a research statement describing how your interests and expertise relate to the position, and two letters of reference to Fabio Pasqualetti at fabiopas@engr.ucr.edu. The appointment will be available as of September 1st 2014, with an expected duration of up to three years. Salary and benefits are commensurate with experience.

The University of California is an Equal Opportunity/Affirmative Action Employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, age, disability, protected veteran status, or any other characteristic protected by law.
